PROFESSIONAL PROFILE

400-level **Surveying and Geoinformatics student at the Federal University of Technology, Akure (FUTA)** with practical experience gained through university fieldwork, survey camp activities, GIS projects and geospatial analysis.

Practical exposure to **topographic, detail, route, engineering, cadastral/boundary, construction and GNSS surveying**, including traverse operations, levelling, road alignment, setting-out, cross-sectioning, contouring and field data collection. Familiar with **Total Station, GNSS/RTK receivers, Automatic/Dumpy Level, Theodolite, EDM and handheld GPS**.

Experienced in **GIS, remote sensing, spatial analysis and digital mapping**, with practical use of **ArcGIS, AutoCAD, Surfer, Microsoft Excel, Google Earth Pro and ArcGIS Earth**. Currently developing skills in **QGIS and Civil 3D**.

Seeking an internship opportunity in **land surveying, engineering surveying, GNSS, GIS, geospatial analysis or related fields**, where I can contribute to field and office-based projects while developing professional competence.

EDUCATION

Federal University of Technology, Akure (FUTA)

B.Tech. Surveying and Geoinformatics
School of Environmental Technology
Expected Graduation: 2028

Relevant Areas: Land & Engineering Surveying, Geodetic Surveying, GNSS/GPS Surveying, GIS & Geoinformatics, Remote Sensing, Survey Computations, Mapping & Spatial Analysis

FIELD EXPERIENCE

Survey Camp & Practical Surveying Fieldwork

Federal University of Technology, Akure — FUTA Annex

- Participated in practical **topographic, detail, route and perimeter/boundary surveys**.
- Conducted and assisted with **traverse surveying, levelling and profile/longitudinal levelling**.

- Participated in **road alignment, cross-sectioning, contouring and engineering surveying** activities.
- Performed practical tasks involving **building setting-out, construction and drainage surveying**.
- Worked with field observations for **area and volume computation**.
- Participated in cadastral/boundary-related surveying activities.
- Assisted with field data collection, organization and technical documentation.

GNSS / RTK Operations

- Static GNSS observation and survey control establishment.
- RTK positioning using base/rover configurations.
- Coordinate and point data collection.
- GNSS stakeout operations.
- Field data download and processing.
- Coordinate transformation.
- Integration of GNSS observations into surveying and mapping workflows.

Team Leadership: Coordinated members of a survey team during field activities, helping allocate responsibilities, organize operations and complete assigned surveying tasks.

SELECTED GIS & GEOSPATIAL PROJECTS

Land Use/Land Cover Change Analysis & Afforestation Suitability Mapping

Ose (Ifon), Ondo State

- Analysed land-use/land-cover patterns using GIS and remote-sensing datasets.
- Worked with satellite imagery and spatial datasets for land-cover analysis.
- Applied GIS-based spatial analysis to evaluate afforestation suitability.
- Applied a **Fuzzy AHP-based approach** to combine environmental and spatial criteria.
- Produced and interpreted thematic maps showing land-cover distribution and suitability levels.
- Documented the methodology, analysis and findings in a technical research report.

Tools: GIS | Remote Sensing | Satellite Imagery | Fuzzy AHP | Spatial Analysis

GIS-Based Spatial Analysis of Road Network, Terrain & Drainage

Federal University of Technology, Akure

- Analysed road network characteristics within the FUTA environment.
- Worked with elevation, contour, road and boundary datasets.
- Performed terrain analysis including **slope and hillshade generation**.
- Applied hydrological processing techniques including **Fill and Flow Accumulation**.
- Conducted proximity analysis using GIS buffering techniques.
- Analysed spatial relationships between roads, terrain, drainage features and selected locations.
- Produced thematic maps and technical documentation presenting the results.

Tools: ArcGIS Desktop | DEM | Spatial Analysis | Terrain Analysis | Hydrological Analysis

LEADERSHIP EXPERIENCE

Survey Project Team Lead

Federal University of Technology, Akure

- Coordinated team members during practical survey camp activities.
- Assisted with field-task allocation and organization.
- Supported the execution and documentation of assigned surveying operations.
- Helped maintain team coordination during field activities.

Web Development Team Lead

Locus Africa | 2026

- Led a team during collaborative web development training and project activities.
- Coordinated tasks and supported team members during project-based learning.
- Assisted with problem-solving and team collaboration throughout the programme.

VOLUNTEERING & PROFESSIONAL ENGAGEMENT

GIS Club — FUTA

- Participate in GIS learning activities and technical sessions.
- Assist fellow students with GIS-related learning alongside the tutor/club lead.
- Support peer learning and practical GIS activities.

Young Surveyors Network

- Supported event activities and student engagement.
- Participated in professional development activities for young surveying students.

Peer Learning & Student Activities

- Assist fellow students with academic and technical learning.
- Support student activities and collaborative learning initiatives.

TECHNICAL SKILLS

Surveying: Topographic Survey | Detail Survey | Traverse Survey | Route Survey | Engineering Survey | Levelling | Setting-Out | Construction Survey | Cadastral/Boundary Survey | Road Alignment | Cross-Sectioning | Contouring | Area & Volume Computation

Surveying Equipment: Total Station | GNSS/RTK Receiver | Automatic/Dumpy Level | Theodolite | EDM | Handheld GPS | Prismatic Compass

GIS & Geospatial: ArcGIS Desktop | ArcGIS Earth | AutoCAD | Surfer | Google Earth Pro | Microsoft Excel | Remote Sensing | Spatial Analysis

Currently Learning: QGIS | Civil 3D

Additional Technical: HTML | CSS | JavaScript | Web Development

PROFESSIONAL MEMBERSHIPS & TRAINING

Nigerian Institution of Surveying and Geoinformatics Students (NISGS)
FUTA Chapter | Southwest | National

Young Surveyors Network

FUTA Research Club

Training & Certificates

- Web/Software Development Training
- NISGS Conference Certificates of Participation

AWARDS & RECOGNITION

- **Best Student/Team Recognition** — Locus Africa
- **Web Development Competition Recognition**
- **Software Development Competition Recognition**

ADDITIONAL INFORMATION

- Open to surveying, GIS, geospatial and related technical internship opportunities.
- Available for both field-based and office-based roles.
- Willing to relocate for relevant opportunities.
