Julius Adeniyi

Software Developer

juliusadeniy012@gmail.com | github.com/Lius-0x1 | +234 8143941286| Nigeria

SUMMARY

Software developer and Surveying and Geoinformatics student at the Federal University of Technology, Akure (CGPA 3.70/5.00, expected 2028). I build web applications with JavaScript and React, currently manage the live Before They Graduate platform, contributed to a six-person React capstone project at TS Academy, and lead a web development team at Locus Africa. Seeking junior developer roles and internships.

EXPERIENCE

Web Development Team Lead, Locus Africa 2026

- Coordinate a web development team, breaking projects into manageable tasks and moving them from idea to working implementation.
- Support teammates through technical challenges.

Participant, RAIN 30-Day Challenge 2024

- Month-long challenge in robotics, AI and innovation built around hands-on problem solving.

PROJECTS

Before They Graduate JavaScript

- Web platform where students find resources and opportunities before they graduate. I currently manage and maintain it.
- Live: beforetheygraduate.app Source: github.com/Lius-0x1/btg

Group 18 Planetary Data Explorer, TS Academy capstone, team of 6 React, Vite

- Single-page React app, built with Vite, that lets users explore planetary metrics and look up solar system data. The team migrated it from static HTML and CSS to a component-based React app.
- Built the Image Gallery component: fetches each planet's name, distance from the Sun and image from the provided API and renders them in a responsive grid.
- Worked in a team Git workflow with feature branches and pull requests, including resolving merge conflicts in the shared stylesheet.
- Live: group-18-capstone-project.vercel.app Source: github.com/zinoefezino/Capstone-project

SKILLS

Comfortable: JavaScript, HTML5, CSS3, REST APIs, Git and GitHub
Working knowledge: React, Node.js, Express, MongoDB, SQL, Python
Geospatial: QGIS, ArcGIS, AutoCAD

EDUCATION

B.Tech Surveying and Geoinformatics, Federal University of Technology, Akure Expected 2028
School of Environmental Technology

Software development training, TS Academy 2026

QGIS training 2026

ACTIVITIES

Member: FUTA Research Club, Nigerian Institution of Surveyors (NISGS FUTA chapter), Young Surveyors Network.
